GMO STATEMENT
(PPS164, Rev. 1.2, 02/18, KMC)

Glycerin (Natural) is derived from palm trees. This product and the raw materials used are not derived from or contain any Genetically Modified Organisms (GMO).

Glycerin is processed from Palm Oil and/or Palm Kernel Oil. Both oils are obtained from palm fruit. Palm oil is obtained from the mesocarp of the *Elaeis guineensis* fruit, simply by cooking, mashing and pressing. In this process, the seeds are separated and after cracking and removing the shell, the kernel can be processed to yield palm kernel oil and palm kernel cake. The oils are split under high pressure (no chemical process) through hydrolysis process which deionized water is added in to drive the splitting process into Glycerin and fatty acids (Caproic, Capric, Caprylic, Lauric, Myristic, Oleic, Palmitic and Stearic Acid). The Glycerin is subsequently refined by evaporation, distillation and bleaching (no chemical process or processing aids).

In addition, each phase of the operation is certified Kosher by a duly authorized and recognized rabbinical authority. Therefore, proper measures for the segregation and handling of this product are in force.

This statement is valid and in effect for all products and lot numbers described herein until otherwise notified in writing by Greenfield Global USA Inc.
