

ORGANIC VOLATILE IMPURITIES / RESIDUAL SOLVENTS
(PPS269, Rev. 1.3, 02/18, KMC)

RE: Organic Volatile Impurities / Residual Solvents in Sodium Hydroxide (NaOH) – all grades – manufactured by Greenfield Global USA Inc. These OVIs, or Class 1, 2, and 3 Residual Solvents, are defined by the current USP/NF General Chapter <467> and International Conference on Harmonization Q3C Impurities: *Residual Solvents*.

Sodium Hydroxide (NaOH) is an inorganic compound manufactured by inorganic processes. Solvents are NOT used at any point in the manufacturing or handling of Sodium Hydroxide.

Greenfield Global USA Inc. maintains dedicated storage and handling systems for our Sodium Hydroxide (NaOH) and neither uses nor has any reason to suspect that any Class 1, 2 3 or Other solvents are produced in the manufacturing process.
